Technical Skills

Programming / Markup Languages
- JavaScript
- Ruby on Rails
- XSLT
- YAML

Operating Systems and Scripting
- Microsoft Windows
- MacOS X
- Linux/ Unix/ Mint

Frameworks
- JQuery
- Node.js
- EXT.js
- Angular.js
- Meteor
- Yeoman
- Jekyll
- Bower
- Grunt
- Gulp

Tools / IDEs
- Sublime Text
- Netbeans
- Visual Studio
- Redmine
- JIRA
- JSLint
- Oxygen
- Netweaver Development Studio

Build Server
- Bamboo
- Team City

Server side and CMS
- Apache Tomcat
- Escenic
- Interwoven TeamSite
- ATG Dynamo
- Publish create
- POWA Web
- JSP
- JSTL
- Java
- MySQL
- ASP.net
- MAVEN
- SAP ABAP

Source Control and Configuration Management
- CVS
- Hudson
- GIT
- SVN

Wireframes
- Sketchflow
- Adobe Fireworks

Methodologies
- Responsive Web Design
- Mobile First
- Agile
- Continuous Integration

Virtualization
- Vagrant
- Docker
- CITRIX

Employment

August 2016 - Present

Went on holiday, then took some time out to study React and Django on
www.codeschool.com…

June 2016 - July 2016

Graphic Digital Agency: Web Developer

Had a great time working at this amazing agency based in Millbank. Surrounded by some exceptional people I worked on a project for the Royal Society.

Responsibilities

- Setting up and building an app for the Royal Society on Machine Learning.
- The app was responsive, cross device/browser compatible and built in Angular JS.

April 2016 - May 2016

Velo Marketing: Web Developer

A short term contract at a small agency in Borough

Responsibilities

- Building a website highlighting child protection issues
- Building an email campaign around the website highlighting child protection issues

May 2015 – March 2016

Keytree: UX Developer

As the first member of the newly formed maintenance team, my role at Keytree was to support three of their biggest clients and their webapps: Jaguar Land Rover, Freshfields and Wetherspoons.

Responsibilities

- Maintaining the front-end for existing webapps
- Investigating, building and testing new feature requests
- Setting up environments for new members of the front-end team
- Deploying new features across multiple country and language sites
- Liaising with clients about new features and estimating time scales

July 2014 – May 2015

Various freelance computer projects involving Angular, node and ruby coding.

- **Fanbookz** football social network- integrated real currency betting with the pre-existing gaming section on their site.
- Working for an agency in London who were building an app for medical insurance information. Technologies I used here were JavaScript, CSS and html. It was also the commercial experience I had using LESS
- **The app business**- built an employee listings app for transport for London. The app was built using angular Js with an asp.net back end.

- · **Bandstand**- fixing a legacy in-house project. It was the admin section which sent bulk emails out to clients. The site was built in ruby with an angular frontend.
- · **The green man pub**- setting up network infrastructure, providing a facility to enable networked devices for the business to communicate privately, and a separate network for patrons to use the internet securely.

February 2014 – June 2014

POWA: Ruby Developer/Front-end Engineer

Working on the fetchApp digital download platform, alongside its creator, my role here was to maintain the system, install new features and fix bugs. After fetchApp was bought by POWA, my role was then work alongside the lead developer on the front-end team.

Responsibilities

- · Maintaining the front-end for existing client sites
- · Investigating, building and testing new feature requests
- · Setting up environments for new members of the front-end team
- · Deploying new features across multiple country and language sites
- · Work efficiently to deadlines and delivering quality solutions
- · Document solution as appropriate to the Project methodology
- · Liaising with account managers on a regular basis
- · Ensuring product knowledge and documentation is detailed and up to date
- · Providing support and assistance to the other members of the front-end team
- · Liaise with the back-end team to facilitate requirement gathering, planning and estimates

November 2013 – February 2014

After leaving Velti, I took the opportunity to travel. I went on an American road trip, then flew to the Caribbean and finished the year off in Ireland.

March 2012 – October 2013

Mobile Front-end Developer

Using mGage Create, a web based platform, I worked with a team of six to create and maintain sites for over 40 brands, companies like Doritos, Skype, Monarch Airlines, BBC Children in Need, and New Look, each of them having differing requirements.

Responsibilities:

- · Building wireframes for medium-to-large scale websites
- · Web design/ Responsive Web Design
- · Mobile application design
- · Server-side programming
- · Social media Integration
- · Ability to diagnose JS/HTML/CSS cross-devices issues and provide solutions
- · Experience building web applications
- · Knowledge of current trends in the web/app industry
- · API integration using SOAP and JSON
- · Localisation for different countries (language translations and content) using xml
- · Web scraping

November 2010 - March 2012

Sagittarius Digital: Front-end Web Developer

The websites I worked on here include Kent Adult Education, Rift UK, Skills Plus, Get Some Headspace and Jacksons Fencing.
Responsibilities:

- Building wireframes for medium-to-large scale websites
- Web design
- Social media Integration
- Ability to diagnose JS/HTML/CSS cross-devices issues and provide solutions

March 2008 – August 2009

Telegraph Media Group: Front-end web developer

I worked on the Telegraph.co.uk website, using content management systems such as Escenic and ATG, to maintain the 'business as usual' side of the website.
- **Responsibilities:**
- Making updates to pages on the telegraph.co.uk website
- Creating promotional microsites
- Creating article types for journalists when needed on the Escenic platform.
- General bug fixing
- Search engine optimisation
- Webtrends tagging of clickable areas
- Installation of new features
- Podcast maintenance
- Creating widgets using jQuery

Education

- 2:1 BSc (Hons) Internet Technology and Applications, University of Plymouth (2004 – 2007)
